

Run every campus from **one system.**

School OS brings academics, online exams, attendance, fees, admissions, parents, staff and operations into one place – so owners see the whole network on one screen, principals run their campus, teachers save hours, and parents stay informed on their phones.

The owner's Command Center: every campus's academics, attendance, fees and operations, with a short daily briefing.

The Parents Portal on a phone.

Everyone gets the screen they need

Owners & directors

The whole network at a glance: which campus is improving, which needs attention, fees collected and admissions in the pipeline.

Principals & heads

Their own campus: results, approvals, attendance, staff observations and parent messages waiting for a reply.

Teachers

Attendance in one tap, marks entered once, homework, leave requests and replies to parents – the reports write themselves.

Parents & students

Results, attendance, fees and how to pay, homework, timetable, transport and notices – on the phone.

16 modules, one login, one set of records

- Academics & Results
- Fees & Concessions
- Homework & Library
- Donors & Scholarships
- Online MCQ Exams
- Admissions
- Health & Clinic
- Procurement & IT
- Attendance
- Parents Portal
- Transport & Security
- Alumni & Certificates
- Timetable
- HR & Payroll
- Communication
- Owner's Command Center

How we get you started

We set up your network

Campuses, classes, subjects, staff and students imported from your existing lists, with your logo.

We train your team

Short sessions for principals, heads, teachers and accounts, so every role knows its own screen.

You go live

Exams, results and fees run on School OS from your next term, with support as you grow. No servers, nothing to install.

See it working – try the live demo
